

SELF-EMPLOYED FEES INCREASE

The second transitory provision of Royal Decree-Law 28/2018, of December 28, for the revaluation of public pensions and other urgent measures in social, labor and employment matters, established a progressive increase in the contribution rates applicable for contingencies professionals and by cessation of activity of self-employed workers included in the Special Scheme of Social Security for Self-Employed or Self-Employed Workers and in the Special Scheme of Social Security for Seaworkers.

Specifically, during 2020:

- For the contribution for professional contingencies, the contribution rate will be 1,1%
- For the cessation of activity, the contribution rate will be 0,8%

In this way, the contribution rate is increased from 30% to 30,3%.

The General Treasury of the Social Security has updated the rates of contributions that have been applied until the settlement period of September 2020, and that corresponded to those foreseen for the year 2019. As a consequence of the aforementioned update, the contributions corresponding to the October 2020 period and later will be calculated with the new rates.

Regarding the regularization that should be made of the fees corresponding to the months of January to September, the General Treasury of the Social Security will inform soon of the collection period in which the corresponding complementary accounts will be charged.
